SUMMARY

Frontend Developer experienced in building responsive, user-focused applications using React.js and modern JavaScript (ES6+). Skilled in component-based architecture, REST API integration, authentication workflows, and UI state management. Built a full-stack MERN social media application and actively seeking a Frontend / React Developer role.

PROJECTS

X(Twitter)Clone–FullStackMERNApplication.

TechStack:React,Node.js,Express.js,MongoDB,JWT,Cloudinary.

Built a full-stack social media application inspired by X (Twitter). Implemented secure authentication using JWT stored in HTTP-only cookies. Developed core features including post creation, image uploads, likes, comments, follow/unfollow, and notifications. Designed and protected RESTful APIs using middlewareIntegratedCloudinary for image upload and media management.

ServiceWebsite–FullStackMERNApplication.

TechStack:React,Node.js,Express,MongoDB,Nodemailer.

Developed a full-stack service booking website for a real-world business use case. Implemented dynamic service pages using React Router and structured service data. Built responsive UI with modern CSS, reusable components, and smooth UX flowCreated a contact form with backend API integration and MongoDB storageIntegrated email notifications using Nodemailer for real-time enquiry alerts. Applied clean MVC architecture with controllers, models, and route Focused on scalability, maintainability, and production-ready design

BikeWebsite–Front-end.

TechStack:React,HTML,CSS,JavaScript.

Designed and developed a responsive bike-themed website using React. Created reusable componentsand interactive UI elements.Focused on layout structure, navigation, and visual design.
